

Case Reports in Spine Diseases is a dedicated specialty section within the **Orthopedic Surgery Case Reports Journal**. This section focuses on publishing high-quality, peer-reviewed case reports and case series related to diseases and disorders of the spine, contributing to clinical education and advancement in orthopedic and spine surgery.

The section covers a comprehensive range of spinal conditions, including degenerative spine diseases, spinal trauma, infections, tumors, congenital anomalies, deformities, inflammatory conditions, and postoperative complications. Submissions highlighting unique diagnostic challenges, innovative surgical techniques, minimally invasive spine procedures, and multidisciplinary management approaches are strongly encouraged.

By presenting detailed clinical findings, imaging studies, surgical interventions, and follow-up outcomes, this section aims to support evidence-based practice and enhance decision-making among orthopedic surgeons, spine surgeons, neurosurgeons, and allied healthcare professionals.

Case Reports in Spine Diseases serves as an important educational resource within the Orthopedic Surgery Case Reports Journal, strengthening the journal's mission to disseminate clinically relevant orthopedic knowledge and promote excellence in spine care worldwide.

Online Submission

Authors are requested to submit their manuscripts using our Online Manuscript Submission Portal: <https://www.orthosurgerycasereports.org/submit.html> (or) may also submit via email to: editor@orthosurgerycasereports.org.
