

Orthopedic Surgery Case Reports Journal is an international, peer-reviewed, open-access journal dedicated to advancing knowledge in orthopaedics and musculoskeletal medicine. The journal publishes high-quality **orthopaedic case reports, case series, clinical images, surgical videos, original research, and review articles** that enhance clinical understanding and support evidence-based practice.

Orthopaedics is the medical and surgical specialty focused on diagnosing, managing, and treating conditions of the **musculoskeletal system**, including bones, joints, ligaments, tendons, nerves, and muscles. Our journal provides a comprehensive platform for publishing cases related to **musculoskeletal trauma, spine disorders, sports injuries, degenerative diseases, congenital anomalies, orthopaedic oncology, and reconstructive surgery**.

We cover the full scope of orthopaedic practice—**prevention, diagnosis, therapeutic interventions, rehabilitation, quality of life improvements, and innovations in surgical technology**. Submissions are welcome in all areas, including **arthroplasty, trauma surgery, hand surgery, foot and ankle, sports medicine, pediatric orthopaedics, orthopaedic oncology, limb reconstruction, and minimally invasive techniques**.

Online Submission

Authors are requested to submit their manuscripts using our Online Manuscript Submission Portal: <https://www.orthosurgerycasereports.org/submit.html> (or) may also submit via email to: editor@orthosurgerycasereports.org.

Specialty-Focused Sections

Case Reports in Musculoskeletal Trauma

Covers injuries affecting bones, muscles, ligaments, tendons, and nerves caused by falls, accidents, direct impact, overuse, or repetitive stress. Includes acute and chronic pain syndromes, fractures, sprains, dislocations, soft-tissue injuries, and workplace-related musculoskeletal disorders.

Case Reports in Spine Diseases

Publishes cases related to cervical, thoracic, lumbar, and sacral spine disorders affecting the vertebrae, discs, nerves, or spinal cord. Topics include traumatic spine injuries, degenerative spinal diseases, deformities, infections, tumors, and congenital spine abnormalities.

Case Reports in Sports Injuries

Focuses on injuries sustained during sports and physical activity, such as sprains, strains, ligament tears, knee injuries, Achilles tendon rupture, muscle swelling, fractures, and joint dislocations. Includes prevention strategies and rehabilitation approaches.

Case Reports in Degenerative Diseases

Covers osteoarthritis, degenerative disc disease, joint degeneration, chronic joint stiffness, pain, inflammation, and age-related musculoskeletal degeneration.

Case Reports in Orthopaedic Tumors

Publishes cases involving benign and malignant bone tumors, soft-tissue tumors, tumor-related fractures, diagnostic challenges, surgical reconstruction, and advanced treatment strategies.

Case Reports in Congenital Disorders

Includes congenital musculoskeletal abnormalities such as cerebral palsy, muscular dystrophy, osteogenesis imperfecta, skeletal dysplasias, limb deformities, and spina bifida. Focus on early diagnosis, surgical correction, and long-term management.
